Short Bio

Anil Shah is a dedicated IT professional and web developer with experience delivering secure, dependable, and user-focused digital solutions. Skilled across both front-end and back-end technologies, he leverages a strong analytical mindset and practical development expertise to build robust websites and web applications. His work reflects a commitment to technical excellence, performance optimization, and reliable problem solving.

Detailed Profile

Anil Shah is a results-driven web developer with solid academic background and technical background in Electrical Engineering and Information Technology. Currently pursuing his bachelor's degree in IT at Oulu University of Applied Sciences in Finland, he combines engineering discipline with modern software development practices to produce well-architected and maintained web platforms.

His professional experience spans full website lifecycle – from requirements analysis and UI implementation to server configuration, deployment, and long-term maintenance. Anil has collaborated with marketing agencies and international clients to develop responsive, performance-oriented websites using technologies such as JavaScript, React, Next.js, PHP, and WordPress. He is proficient in managing hosting environments, optimizing site performance, resolving security vulnerabilities, and integrating custom functionalities tailored to client needs.

He is particularly interested in advancing his expertise within the JavaScript ecosystem and exploring cloud-native and real-time application development. His long-term ambition is to contribute to Finland's technology sector by building innovative software solutions and applying his engineering experience to complex, scalable digital products.

Core Skills & Competencies

- **Programming & Web Technologies:** JavaScript, TypeScript, React, Next.js, React Native, Node.js, Python, C, C++, Apache, Nginx, Kotlin, SQL, PHP, HTML, CSS, WordPress, GHL, WebFlow, E-commerce
